# HOME TIPS FOR SUCCESSFUL VIDEO CALLS

Here are some ways to help your child have a positive video call experience while away from school:

**Make sure your child has a quiet space dedicated for video calls away from distractions.**

---

**Remember that you can be heard by the entire class when your child is in the video call.**

---

**Keep in mind that your child's teacher is recording instruction for students who cannot attend sessions live.**

---

**Anything visible in the area where your child is attending class virtually can be seen by others.**

---

**After helping your child get started, allow your child to be as independent as possible while attending instruction.**

---
