

NCWISE (Student Information)

The screenshot shows a web-based login interface for NCWISE. The main window is titled "Oracle Developer Forms Runtime - Web" and contains a "Window" pane with a repeating "eSIS" logo background. A smaller "NCWISE logon" dialog box is centered, featuring input fields for "Username:", "Password:", and "Database:", along with "Connect" and "Cancel" buttons. The bottom status bar shows "Record: 1/1".

The North Carolina Window of Information on Student Education (NCWISE) is a statewide information management and reporting system that will provide teachers, principals, counselors, nurses, central office staff and others with immediate access to data on students in the North Carolina school system. NCWISE supports accountability management for federal and state reporting requirements associated with No Child Left Behind, and the ABCs Accountability program.

NCWISE is an electronic student information system that is based on eSIS, a web-based software package that provides student and school information management capabilities. Developed by a Canadian company, you may see variations and differences in spelling and terminology such as "colour for color" and "marks for grades." Please be aware these irregularities exist as this program is widely used internationally.

Central Office staff, administrators, teachers and school staff are assigned a specific security role and log in name and can access only the information allowed for that security type. Each NCWISE account is password protected. Teachers log in to NCWISE to access their personal electronic gradebook.
